Summary

I am a motivated Computer Science and Engineering student with strong skills in MERN Stack development and graphic design using Adobe Illustrator. My academic and leadership experiences, including active involvement with the IEEE BUBT Student Branch, have helped me build solid technical abilities as well as teamwork, communication, and event management skills. Passionate about social work and continuous learning, I am eager to apply my problem-solving mindset and dedication to contribute positively in a professional environment while growing both personally and professionally.

Education

Salanga Islamia High School

Science

4.50 out of 5.00

2015-17

Secondary

Vocational Teachers Training Institute (VTTI)

Computer Technology

3.65 out of 4

2017-2022

Diploma

🔗 <https://vtti.bogra.gov.bd/en>

Bangladesh University of Business and Technology (BUBT)

CSE

3.55 Out of 4

July 2022-june 2026

Bachelor of Science in Engineering

🔗 <https://bubt.edu.bd/>

Skills

React.js

Skilled in building dynamic, responsive, and component-based web applications using React.js.

● ● ● ○ ○

React.js, Frontend Development, Components, Hooks, SPA, JavaScript

Node.js

Skilled in developing backend services and APIs using Node.js for scalable web applications.

● ● ● ○ ○

Node.js, Backend Development, REST API, JavaScript, Express.js

MongoDB

Skilled in using MongoDB for managing and organizing data in modern web applications

● ● ○ ○ ○

MongoDB, NoSQL, Database, Mongoose, Data Management

Adobe Illustrator

Skilled in creating creative and professional graphics, logos, and illustrations using Adobe Illustrator.

● ● ○ ○ ○

Adobe Illustrator, Graphic Design, Logo Design, Illustration, Creative Design

Extra Curricular Activities

IEEE BUBT Student Branch

Chairperson

May 2025- Present
Rupnagar, Mirpur-2, Dhaka-1216, Bangladesh

Projects

Pharmacy Data Analytics Dashboard

Jan 2025-May 2025

🔗 <https://github.com/TeamPentagon5/Pharmacy-Data-Analytics-Dashboard>

Data Transfer System Using Li-Fi for Sound Pollution Control

Designed a Li-Fi-based vehicle communication system using LDR sensors and Arduino to reduce noise pollution.

26 December, 2024

Smart E-Commerce User Platform (Full-Stack Web Application)

Designed and implemented a full-stack e-commerce system featuring JWT & OTP authentication, product management, reviews, cart, wishlist, invoice generation, and SSLCommerz (bKash & card) payment gateway integration using React, Express.js, and MongoDB.

A Deep learning Based Network Intrusion Detection System

A system using deep learning to detect network threats and prevent unauthorized access accurately

July 2025 - Present

A Hierarchical Multi View Graph Learning Framework for Malicious URL Detection

Built a 2-stage graph learning framework to detect and classify cyber threats, achieving 98.91% binary and 93.00% multiclass accuracy.

Jan-April 2026

Explainable Early Sepsis Prediction in ICU Using Self-Attention LSTM and Focal Loss

Developed a novel Deep Attention-LSTM model to predict ICU sepsis 6 hours before clinical onset using the PhysioNet 2019 dataset.

Jan-April 2026

Publications

A Decade of Healthcare Cyber Threats: Empirical Analysis, Evidence-Based Prioritisation, and AI Threat Model

Springer

May 2026

Accepted at ML4CS 2026, 2026. Proceedings publication pending.

A Hierarchical Multi View Graph Learning Framework for Malicious URL Detection May 2026

IEEE

Ongoing

Network Discovery with Nmap: Finding Local Devices

Cyber Research Hub
